

# Products Presentation

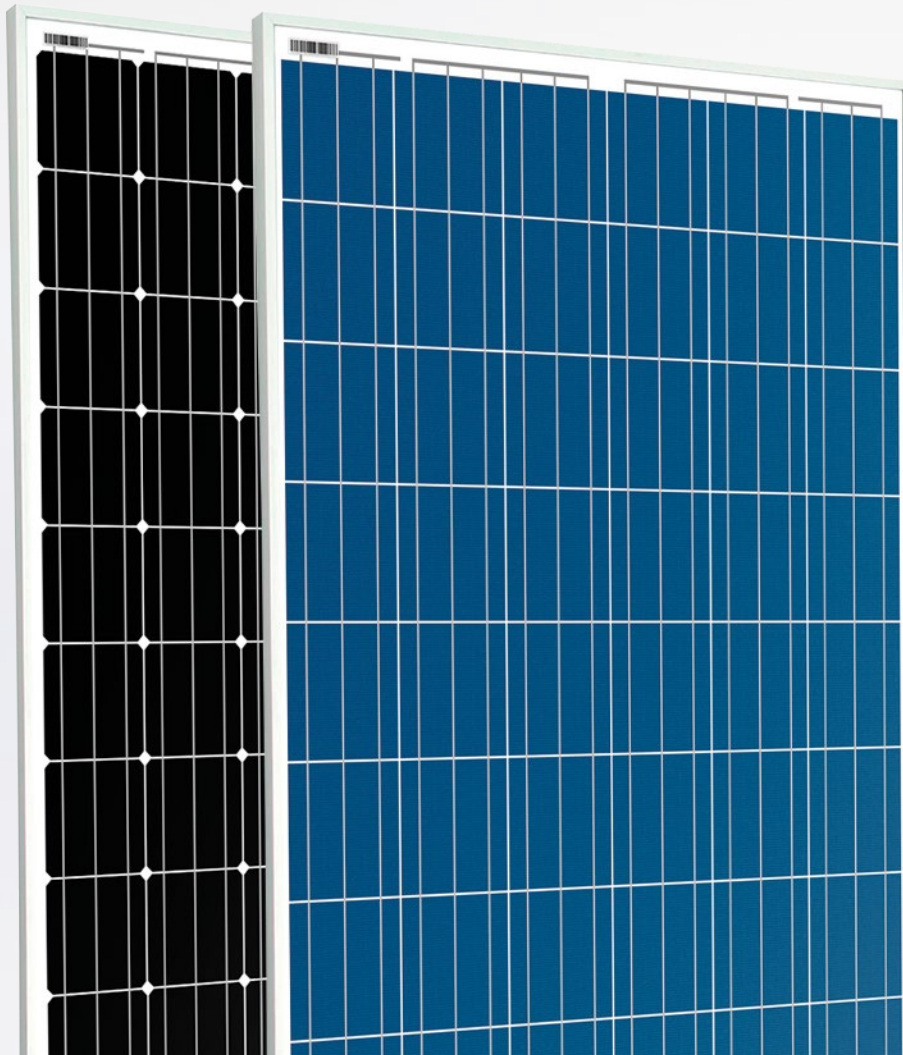

Discover our high performance **solar panels** and **kits**.

TM-Series®

TM-Systems®

# TM-Series<sup>®</sup>

Mono & Polycrystalline High Performance Solar Panels.

## High PID Resistant

Our TM-Series modules have passed the potential induced degradation test (PID), certainly an additional guarantee.

## Grade A+ Cells

We select the best solar cells to get a high performance output modules, allowing us to create a high quality and efficiency product.

## Positive Tolerance

The result of A plus cells selection, becomes into quality modules with positive tolerance up to 5w.

## 30 Years Lineal Warranty

Enjoy now with the new 30 year linear power warranty and 10 years product warranty offered by Tamesol.

# +900MW/year

Several production lines spread throughout the world.

---

# Grade A+

Accurate cell selection.

---

# 11 Years experience

+ 150 projects around the world.

---

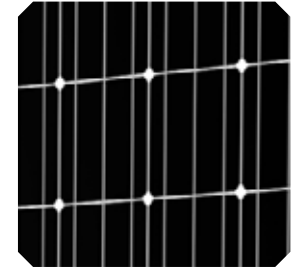

We submit the entire production chain to the strictest quality controls. All the stages in the development of the photovoltaic panel are susceptible of improvement, that is our mission.

# TM-Series® Monocrystalline

Power range from 30 to 375 Wp

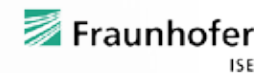

5' with 72 cells.

6' with 36, 48, 54, 60, 72 cells.

PERC & All black solar panels available.

We meet the most demanding international quality standards, only in this way can we ensure the success of our clients.

IEC 6125, IEC 61730, ISO 9001:2008, ISO 14001:2004, BS OHSAS 18001:27, PV Cycle, MCS, PID, WEEE.

Polycrystalline Panels 

# TM-Series® Polycrystalline

**TM-Series**  
TM-P660270HP

**Polycrystalline Solar Panels**

**270W Power**

**16.58% Efficiency**

**0/+5W Tolerance**

**Lineal Performance Warranty**

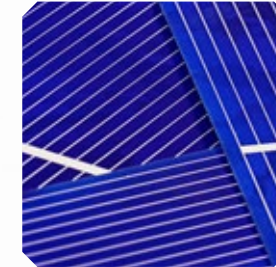

**10 YEARS PRODUCT - 30 YEARS POWER**

**Key Features**

- High PID resistant:** TM-Series has proved resistance to degradation induced power.
- Advanced glass:** High transmission glass resulting in increased energy production.
- High efficiency and durability:** Manufacturing process certified, excellent performance under low light environments.
- Robust and common free modules:** Certified for wind and the most challenging environmental conditions.

Where innovation for cost effectiveness becomes success.

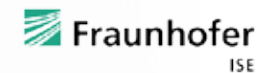

**Tamesol**  
ENERGIA PARA VIVIR

**Power range from 30 to 340 Wp**  
6' with 28, 36, 48, 54, 60, 72 cells.  
*PERC & BIPV solar panels available.*

We meet the most demanding international quality standards, only in this way can we ensure the success of our clients.

IEC 6125, IEC 61730, ISO 9001:2008, ISO 14001:2004, BS OHSAS 18001:27, PV Cycle, MCS, PID, WEEE.

# TM-Systems®

Our solar kits with perfectly matched components.

## Home & Business

**SELF-CONSUMPTION KITS**

- NET-METERING
- WITH STORAGE
- ZERO INJECTION

### Kits

- 3.18 KWp
- 6.89 KWp
- 9.54 KWp

- Injection to grid and 3 operating modes for storage kit version.
- TM-P660265 Solar panel with 16.28% of efficiency.
- Module with 30 years lineal performance european warranty.

## PV Carports

**PV CARPORTS KITS**

- PV CARPORT
- PV CARPORT WITH EV

### Kits

- 6.4 KWp
- 11.7 KWp
- 23.3 KWp

- High PID resistant and high efficiency & excellent performance.
- Remote monitoring via web server. Control from any device.
- Enhanced design for easy installation and long term reliability.

## Solar Pumping

**DIRECT PUMPING KIT**

### Kits

- 2 HP
- 3 HP
- 7.5 HP

- International certificates to ensure the best quality and performance.
- 4" Submersible pump with floating drivers.
- Autonomous operating and wide range.
